DSHEA ACT of 2010 by McCain

As proposed by Senator John McCain, the Dietary Supplement Safety Act of 2010 enjoys support from many members of Congress. It is basically an invitation for the FDA to assume broad new powers and replicate here the system now operating in Europe over dietary supplements where dietary ingredients are presumed adulterated and unlawful to sell unless pre-approved by the government. According to one news analyst, 'He is intent on regulating supplements as if they were radioactive enriched uranium

rather than bioactive vitamins, minerals, amino acids, and botanicals that more often than not help people.' Please write your Congressman immediately to Kill the Dietary Supplement Safety Act of 2010 in committee. It's unsafe for health and Natural Therapies Freedom!
