News Briefs

Now, radiation has been detected in U.S. milk products at nearly 300% of EPA maximums. This is important because milk is produced by cows eating grass, of course, and milk is an indicator of how radiation can get concentrated up the food chain. If the milk is radioactive, then what about the beef?

And what does this mean for the coming summer harvests across North America? Will all the crops be contaminated with radiation, too? Read more in this groundbreaking article by Ethan Huff:

Just in from Natural News ... Look at what just happened in Detroit to an African-American mother of a 13-year-old daughter:

For refusing to medicate her daughter with dangerous psychiatric drugs, she was subjected to an attempted kidnapping by CPS, then her front door was broken down by armed police, then a SWAT team besieged her house for 12 hours with semiautomatic weapons, and now she faces multiple felony charges.

Clarification

When you are renewing your certification, please fill out a Recertification Application - not a Certification form that is used to apply for a new certification.

We receive many calls and emails every. Calls and Emails are returned in the order they are received Monday - Thursday. If you are inquiring about whether we received your fax or check, answers will be returned by email. Thank you for your support and patience.

✚ Is your certification expiring?

Check your certificate or email us for your expiration date. Visit our website at <http://ntcb.org/apply.html> and follow the instructions to pay online and download a recertification form for your designation. You may also mail your recertification into headquarters (address on the application). Each designation is \$65/year.

✚ Have you moved lately?

Let us know how we can find you by sending us your new contact information, including email address, to ntcb.info@gmail.com. Thank you!

Thanks to all for your continued support.
